

V-ALERT

DECISION SUPPORT SYSTEM

V-Alert is a decision support system that provides customized, real-time visual monitoring to help you make well-informed decisions and ensure a safer and more predictable operating environment.

V-Alert aggregates live, static, and historical data from internal and external sources giving you an unmatched, holistic view of the risks facing your business. Make well-informed strategic decisions faster and with more confidence with V-Alert's web-based and mobile application.

"Earthvisionz has not only exceeded our expectations, but they quickly adapted their algorithms to present COVID-19 data. V-Alert was a key asset in keeping our clients up to date in real-time, achieving the level of communication and service that we are known for."

—Fahem Islam
National Field Representatives

View All Assets & Act Fast

Save time and money by relying on a comprehensive view that aggregates all relevant information for fast and effective decision making

Ensure Accuracy

Eliminate the human error that comes with individually evaluating a wide range of data sets generated for assets affected by severe weather and other crises

Streamline & Simplify Operations

Automatically filter secure information for specific teams and clients to get the right information to the right person at the right time on any device

Get Started Quickly

The fast onboarding process and intuitive interface make it possible for you to be up in running in a matter of hours

Understand All Events

Get control and know which assets are affected in real-time with aggregated data from 140 types of events.

Make Critical Decisions Faster with Highly Localized Intelligence

- COVID-19
- Earthquakes
- Fire
- Floods
- Hail
